Github: https://github.com/devsteve06

Professional Summary

Detail-oriented Backend Developer with hands-on experience developing full-stack web applications, designing relational databases, and building REST APIs using Node.js, Express.js, and PostgreSQL. Strong understanding of software engineering principles, API security, database design, Git workflows, and backend best practices. Committed to delivering reliable, scalable solutions while continuously expanding expertise in cloud technologies, testing, and system design.

Technical Skills

Languages: JavaScript (ES6+),Typescript, SQL, Java,MongoDB
Backend: Express.js, RESTful APIs
Authentication : JWT,bcrypt
Testing : Jest
Databases: MongoDB, PostgreSQL, Supabase
Version Control : Git/GitHub,
Deployment : Render
Core Concepts : Clean Architecture, Database Design, Performance Optimization, Error Handling, Api Security, CI/CD, System Design

Experience

Software Developer intern

JTN AFRICA | June 2026 - August 2026

- Engineered And debugged RESTful API endpoints, improving request handling and backend responses times.
- Collaborated with senior Developers through git and code Reviews to maintain clean codebase standards.

Key Projects

Kaida | E-Commerce Platform

Stack: Node.js, Express, Supabase, Stripe API

- Architected a dual-repository e-commerce system with custom cart logic

  And Stripe payment integration.

- Designed optimized database models to efficiently handle high-volume product catalogs and user order histories.

StudentConnect | Internship and attachment portal

Stack: TypeScript, React, Node.js, REST APIs

- Architected a recruitment portal connecting students with prospective employers for attachments and internships.
- Built role-based authentication and application tracking workflows using
- TypeScript for enhanced code reliability.

DevLog | Developer Content Platform

Stack: TypeScript, Node.js, Express, MongoDB

- Developed a developer-focused publishing platform supporting technical article creation and engagement.
- Implemented RESTful APIs and clean architecture principles to ensure seamless data delivery and maintainability.

Education

Technical University of Mombasa | Mombasa, Kenya

Bachelor of Science in Mathematics and Computer Science | Expected 2027

Coursework: Data Structures and Algorithms, Database Management Systems, System Design, Computer Architecture & Organization,Software Developement Life Cycle

Certifications

- Ai Ethics (**Datacamp**)
- Artificial Intelligence Training(**ICTA kenya**)

Interests

Technical:

- Artificial Intelligence
- Performance Optimization

Professional :

- Mentoring and knowledge sharing
- Hackathons

Personal:

- Chess
- Reading Technology Books

Core Competencies :

- Attention to Detail
- Adaptability
- Communication
- Continuous Learning
